Ordnance Survey AC0000808122.

Contains OS data © Crown copyright 2025.

Zone of Theoretical Visibility (ZTV) has been generated using Ordnance Survey Terrain 5 digital terrain model (DTM) which does not take into account the screening effects of vegetation, buildings or other structures.

The ZTV is based upon a series of points at 50m intervals along the proposed access tracks. Assessed with 2m high vehicles and an observer eye height of 1.6m

All heights mentioned are above ground level (AGL) unless otherwise specified.
ZTV assessment considers the curvature of the earth.
