Zone of Theoretical Visibility (ZTV) has been
generated using Ordnance Survey Terrain 5 digital
terrain model (DTM) which does not take into
account the screening effects of vegetation, buildings
or other structures.

The ZTV is based upon a combination of Figures
6.2A, 6.2B, 6.2C and Permanent Compounds from
6.2D; refer to these figures for additional information.

All heights mentioned are above ground level (AGL)
unless otherwise specified.
ZTV assessment considers the curvature of the
earth.
